

Migal - Galilee Technology Center is currently seeking to recruit scientists for group leader positions in a broad range of scientific areas, including Biology – biochemistry, microbiology, nutrition, epidemiology, system biology and bioinformatics as well as chemistry, biotechnology and environmental Sciences.

Scientists at Migal will benefit from a young, stimulating and competitive research environment as well as a joint teaching position at the Faculty of Sciences at Tel-Hai Academic College. New principal investigators will receive attractive startup funding for establishing their new labs and will be expected to carry out independent research programs and to submit proposals for research grants.

Candidates towards the end of their post-doctoral period who have demonstrated excellence in research are encouraged to apply. Initial applications should include Curriculum Vitae, a list of publications and a short summary of the candidate's future research plans (up to 1 page).

Migal is also offering a new research group leader-Entrepreneur track, designed to help researchers with applied research projects and bring them to proof-of-concept and commercialization. Participants will benefit from a principle investigator position in an academic environment, while receiving funding and professional guidance from the Migal Innovation Lab to pursue their idea.

Migal-Galilee Technology Center is located in Kiryat Shmona, in the Upper Galilee. Migal employees enjoy the region's exceptional natural setting and rich community life, and are committed to promoting a dynamic, knowledge-based economy at Israel's Northern periphery.

Migal representatives will be meeting with potential candidates in several locations in the USA some time during January-February. If you are interested in taking part in such a meeting, to learn more about the independent researcher opportunities at Migal, please send an email to: [rutis@migal.org.il](mailto:rutis@migal.org.il)
