## SHANA TOVA WISHING FOR A YEAR OF PEACE

Consulate General of Israel in Hong Kong and Macau

September 2014

Dear friends,

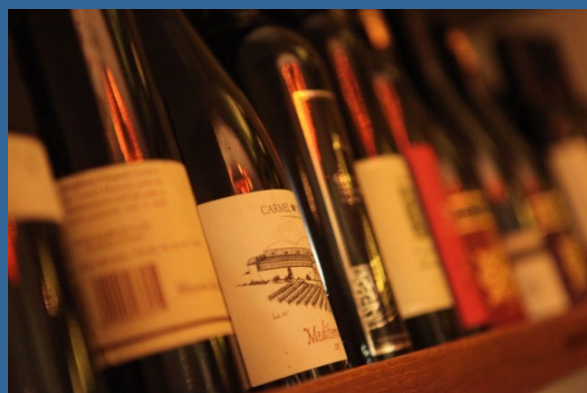

It has been a long and not easy summer in Israel.

As we approach the high holidays season I can assure you that the Israeli economy is gearing up for the challenges ahead and the spirit of innovation is as strong and vibrant as ever.

As Jews all over the world are preparing for the new year (Rosh Hashana) we are preparing ourselves for strong Israeli wine presence in Hong Kong, cultural activities and of course continuation of the bilateral economic exchange.

I want to thank all our supporters and wish you all happy New Year and Shana Tova,

Sagi Karni  
Consul General of Israel

### Taste of Israeli wine at Wine & Dine Festival

Israel is taking part in the much anticipated Hong Kong Wine & Dine Festival this year. At the Israeli pavilion we will feature various brands of Israeli wine, with the help of a wine connoisseur coming especially from Israel. [More >>](#)

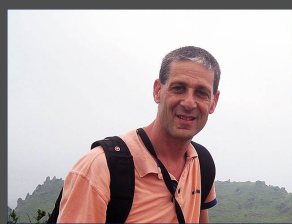

### Young Israeli pianist to perform in Hong Kong

Once again, the Consulate General of Israel in Hong Kong is proud to organise a concert of Young Artists Competition (Jerusalem) winner in Hong Kong, in co-presentation with the Hong Kong Academy for Performing Arts and to be held on October 30. [More >>](#)

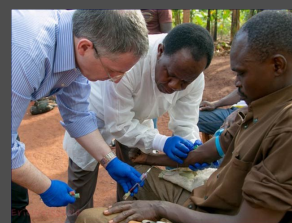

### Israeli ingenuity powers wearable technology

At Israel's first WearableTech Conference, people came from several countries to see what the startup nation has to offer in this rapidly emerging field, including 28 people from China. [More >>](#)

### Meet the magnet-free computer of the future

Israeli research closes in on the possibility of an inexpensive, energy-efficient computer as small as a flash drive and as powerful as a mainframe. [More >>](#)

### Israelis race to find Ebola vaccine

Two Israeli doctors are studying Ebola and Marburg virus survivors in the latest West African epidemic to develop a human antibody therapy, with funding from the US National Institutes of Health and other resources. [More >>](#)

### Unique fire forecasting system saves lives

Matash, a Public Security Ministry development, predicts how a forest fire will spread and helps authorities make better decisions to fight it. [More >>](#)
