# Think green, it pays

**17<sup>th</sup> Annual International Summit and Exhibition**  
for Energy Efficiency, Renewable Energy, Green Building,  
Recycling, Green Transportation and Water Technologies  
**29-30 January 2013, Tel-Aviv, Israel**

# CLEANTECH 2013

Think green, **it pays**

CleanTech 2013 is the **17th annual international event for Clean Technologies**: Water Technologies, Energy Efficiency, Renewable Energy, Recycling, Green Transportation and Green Building.

The CleanTech exhibition has gained the status of a high quality international business platform, where companies, researchers and professionals display their newest developments, novel technologies and outstanding quality services in the fields of environmental protection and green solutions, infrastructure, renewable energy, waste treatment, water treatment technologies, desalination, harvesting, purification, filtration and more.

**During the exhibition, there are professional conferences, seminars and symposiums, in which executives come to learn.**

CleanTech 2013 promotes excellence in the CleanTech field: **World CleanTech Awards** will be delivered to outstanding candidates at the official ceremony. If you have a candidate to suggest please contact the organizers.

## The central meeting point of CleanTech industry in Europe, Asia and Africa

The geographical location of CleanTech 2013 - in the middle of three continents - Europe, Asia, and Africa - makes it an international magnet for companies to expose their products and services to international customers and traders, and for buyers to create new commercial contacts.

Israel is a hotbed of cleantech entrepreneurship. According to a new report from the Cleantech Group and WWF, Israel is the second most innovative country worldwide for cleantech (Denmark ranked first). "Coming Clean: The Cleantech Global Innovation Index 2012" finds that Israel leads the world in creating cleantech companies and has produced a disproportionate number of high-quality firms.

This is an extraordinary opportunity and fertile ground for the creation of beneficial business relationships between those who work with you and the relevant sectors in Israel.
