

World Wind Energy Conference (WVEC 2015)
Hosted by: World Wind Association & IsraWEA

14th World Wind Energy Conference & Exhibition | 26-28 October, 2015 | Jerusalem, Israel

Scientific Program is Online
Join Us!

The World Wind Energy Association in cooperation with the Israeli Wind Energy Association, invites the Wind Power Community from around the world to join key opinion leaders, industry professionals and researchers at the 14th World Wind Energy Conference (WVEC), October 26-28, 2015 in Jerusalem.

This year's World Wind Energy Conference will focus on wind power innovation for a 100% renewable energy supply, in harmony with the environment and society.

INDUSTRY OPPORTUNITIES

Reach the world's leading wind and renewable energy professionals at WVEC 2015. Sponsorship options enable you to showcase your company as it best suits your needs and budget and gain full access to all networking benefits.

WIND ENERGY MARKET TOWARDS 2030

As part of the international climate change agreement, expected to be adopted by the UN at the PARIS Climate conference on December 2015, Israeli governmental officials are preparing the roadmap to setting its binding goal of emissions reduction for 2030.

The Israeli Wind Energy Association's CEO and executive chair of the WWEC2015, Gadi Hareli, encourages the government to aim at **2.5GW of wind energy for 2030**, following the work of mapping and potential evaluation performed by the Israeli Meteorological Services (IMS) office.
